

HYDROMETTE® BL COMPACT B 2

see page 18

The BL Compact B 2 unit is an electronic **structural moisture meter** for non-destructive building material moisture measurement. The Hydromette® unit uses the dielectric constant/radio frequency principle of measurement. The versatile ball sensor is used to sense moisture in building materials of any kind as well as to determine the **moisture distribution** in walls, ceilings, and floors.

For each building material, an individual limit may be set, the violation of which will be indicated by an **audible alert**.

An ideal **pre-tester** for all CM measurements.

MEASURING RANGE

- **STRUCTURAL MOISTURE**
 - 0 to 199.9 digits (scanning range)
 - 0.3 to 6.0 wt.-% or
 - 0.3 to 4.0 CM-%

PROPERTIES

- Characteristic curves for 7 types of building materials
- Audible alarm feature
- Unit temperature display
- 200 mm [L]

APPLICATION It is of importance **how the unit is held** while measuring: The **BL Compact B 2** unit should be held at the rear part of the unit and applied to the material to be measured in a 90° angle.
