

# SMET WASTE STREAM DASHBOARD

Reporting Period: April 2025 – April 2026

Total Waste	Recycling Rate	Non-Recyclable
23.78 t	83.8%	16.2%

Waste Distribution

Stream	t	%
Dry Recycled	1.03	4.3%
Non-Recyclable	3.85	16.2%
PP Big Bags	18.90	79.5%

### Key Insights

- Strong circularity driven by PP bag recovery
- Dry recycling underutilised – improvement opportunity
- Residual waste remains key reduction focus

### Actions (2026–2027)

- Increase recycling >90% diversion
- Reduce non-recyclable waste <10%
- Expand closed-loop Big Bag system

*Aligned with ESG and Circular Economy principles | Focus on material recovery and landfill reduction*
